Personal Profile

Software Developer with 8 years of experience designing, supporting, and scaling cloud-native backend systems in production environments. Strong expertise in Node.js (NestJS), Typescript and AWS, with hands-on experience troubleshooting complex issues, performing root cause analysis, and improving system reliability. Experienced in designing and architecting backend services to be scalable and maintainable with clean testable code tested using unit and integration testing (Jest), having a collaborative approach to working in agile, customer-focused engineering teams. Passionate about mentoring engineers, researching and evaluating new technologies. Known for clear communication, analytical problem-solving, and a focus on delivering real impact for clients.

Core skills

Programming & Frameworks: Node.js, NestJS, TypeScript, Java

Cloud & DevOps: AWS (ECS, EC2, Lambda, RDS, DynamoDB, S3, SQS, SNS, CloudFormation, VPC),

CI/CD: GitHub Actions, Docker, AWS CDK, **Databases:** Oracle, DynamoDB, MongoDB, Redis, **Testing**

& Quality: Jest, Supertest, k6 **Addons:** Git, Jira, Cursor, React

Work Experience

Senior Software Developer

Sligo, Ireland

Evolutio Care Innovations

March 2025 - Present

- Leading a team of 3 backend engineers to develop cloud-native microservices for UK eyecare clinics using Node.js (NestJS), AWS with GithubActions and Docker for CICD.
- Act as escalation point for complex production issues, troubleshooting incidents, performing root cause analysis, and implementing long-term fixes.
- Collaborate with QA, and product teams to ensure high availability, fault tolerance, and secure data processing.
- Mentor junior developers and interns, review peer code, and define backend coding and deployment standards.
- Optimize SQL queries and database schemas to support high-volume appointment and clinical data processing.

Key Achievements:

- Owned and successfully migrated legacy services to AWS Cloud and automated deployments with GitHub Actions and AWS CDK, achieving near-zero downtime and faster release cycles.
- Architected and built a WebSocket-based internal chat application enabling real-time communication among Evolutio employees using Socket.IO.
- Designed distributed request-tracking system using SQS, Lambda, and DynamoDB, improving observability and asynchronous processing reliability by 40%.
- Increased automated test coverage to ~90%, reducing production defects and improving release confidence.

Software Engineer

Dublin, Ireland

Ergo Technology Group

Sep 2024 - Feb 2025

- Developed backend integrations supporting IT service management and customer support workflows.
- Worked with stakeholders to analyse issues, reproduce defects, and deliver fixes.
- Designed and executed structured test cases using ServiceNow Test Management Framework.

Key Achievements:

- Built a ServiceNow chatbot enabling engineers and customers to track IT tickets, reducing resolution time by 50%.

Senior Software Developer

Techspian

- Developed and supported high-throughput microservices platforms handling thousands of requests per minute.
- Investigated and resolved performance bottlenecks, latency issues, and production incidents.
- Designed reusable networking and service-layer components for backend standardisation.

Key Achievements:

- Implemented distributed logging and tracing using AWS Firehose and Kibana, improving debugging and RCA efficiency by ~30%

Pune, India

Mar 2021 - May 2023

Senior Software Developer

Threeplus

- Led project development for multiple client applications using Node.js and AWS alongside iOS and Android mobile application development.
- Mentored a distributed development team and supported production deployments.

Key Achievements:

- Delivered 10+ production-ready web and mobile applications with stable performance and maintainable architectures.
- Built scalable location-based services supporting real-time updates and geospatial queries.

Pune, India

June 2019 - Jan 2021

Software Developer

e-Zest Solutions Pvt Ltd

- Developed backend services and supported client applications in production.
- Maintained and improved existing backend systems and wrote technical documentation for it.

Key Achievements:

- Built and deployed multiple customer-facing web applications using Node.js and cloud technologies.

Pune, India

Aug 2017 - June 2019

Technical Skills	Soft Skills
- Cloud Architecture & Microservices - Production Troubleshooting - CI/CD Automation - SQL & Database Tuning - Observability & Monitoring	- Leadership & Mentoring - Problem-Solving - Agile Collaboration - Communication - Customer Focus

MSc in Advanced Computer Science

Technological University Dublin

- LLD(Design Patterns) / HLD
- React

Sept 2023 – Oct 2024

Dublin, Ireland

Bachelors in Computer Science

G.H Raisonni College Of Engineering

- C, C++
- Databases

Aug 2011- Sep 2016

India

- Node.JS
- Cloud Computing

- Data Structures
- Software Design (OOPs)

Certifications

KodeKloud - ECS, S3, EC2, Lambda

AWS Certifications

Pursuing AWS Solutions Architect

Learning Kubernetes, Agentic AI
