

SALIL LULEY

Software Developer

7 years of expertise in architecting distributed backend systems & microservices with recent focus on integrating multimodal LLMs and vector databases for AI-powered applications.

SKILLS

Backend: Node.JS, NestJS, Jest, Spring Boot Framework, Microservices **Cloud & DevOps:** Docker, AWS, AWS CDK, Azure, GitHub Actions **Databases:** Oracle, MySQL, Redis, MongoDB, DynamoDB **Languages:** TypeScript, JavaScript (ES6), Java **AI/ML:** Multimodal LLMs **Additional:** React.JS, iOS (Swift), Android (Java), HTML, CSS

WORK EXPERIENCE

EVOLUTIO CARE INNOVATIONS

Sligo, Ireland

SENIOR SOFTWARE DEVELOPER

Mar 2025 – Present

- **Eye Care Solutions:** Architecting scalable backend services for our eyecare clinics using **NestJS (Node.js)**, **AWS Services**, **AWS Oracle RDS**, enabling secure, high-availability data processing for UK clinics.
- **Developed** an intelligent appointment scheduling engine utilizing greedy search and backtracking algorithms to **optimize clinic slot allocation**, reducing booking conflicts and maximizing resource utilization.
- **Team Leadership:** Leading a team of **backend developers**, defining **best practices** in code quality, CI/CD pipelines (**GitHub Actions**, **AWS CDK**), and **agile delivery** to ensure predictable, on-time releases.
- **Employed distributed request-tracking** system using **NestJS EventEmitter**, **AWS SQS**, **Lambda**, and **DynamoDB**, enabling reliable asynchronous workflows and improving system observability across microservices.

ERGO TECHNOLOGY GROUP

Dublin, Ireland

SOFTWARE DEVELOPER

Sept 2024 – Feb 2025

- **Ergo Projects:** Designed, developed, and implemented **customized ServiceNow solutions** to address **ITIL project requirements**. Leveraged ServiceNow's Test Management Framework 1.0 to design, execute, and manage comprehensive test cases, ensuring quality assurance throughout the development lifecycle.

TECHSPIAN

Pune, India

SENIOR SOFTWARE DEVELOPER

Mar 2021 – May 2023

- **Fittr:** **Architected** and led development of a high throughput **microservices platform** processing 50K+ daily requests, achieving reduction in system response time through **optimized database queries** and **caching strategies**.
- **TravelBrands:** **Designed** and implemented **distributed backend architecture** for flight booking system handling 10K+ concurrent users, integrating Sabre APIs. **Implemented** database **schema design**, set up **CI/CD pipelines**, caching and **version control**.
- Led technical design reviews and **mentored junior developers**, focusing on microservices **best practices** and **clean architecture** principles.

THREEPLUS

Pune, India

SENIOR SOFTWARE DEVELOPER

June 2019 – Jan 2021

- **Parco:** **Architected** and **led development** of location-based **backend services** supporting 5K+ users, implementing geospatial queries and real-time updates using Node.js and MongoDB. **Led** a team of **developers**, establishing coding standards and review processes.

e-ZEST SOLUTIONS PVT LTD

Pune, India

SOFTWARE ENGINEER

Aug 2017 – June 2019

- Developed scalable backend services with Spring boot for Detroit Athletic Club App, handling authentication, real-time notifications, and RESTful APIs for 10K+ users with high availability.

EDUCATION

MSc In Computer Science (Advanced Software Development)

Dublin, Ireland

Technological University Dublin.

Sept 2023 – Dec 2024

Coursework: Software Design, Systems Architectures, Advanced Databases, Secure Systems Development, User Experience Design.

PROJECTS

SmartWardrobe – **Developed** the backend for an **AI-driven fashion platform**, utilizing **multimodal LLMs** for natural language search and image similarity matching, with a recommendation system powered by **vector databases** and OpenAI CLIP model embeddings. [GitHub](#).
