PROFILE

Results-driven Software Developer with 7 years' experience designing and developing scalable backend systems, cloud-native architectures, and DevOps automation. Expert in building distributed microservices on **AWS and Node.js/NestJS**, integrating **CI/CD pipelines and automated testing (Jest, Supertest)**, and leading cross-functional teams to deliver high-performance, secure applications. Passionate about backend optimization, cloud infrastructure, and building reliable, maintainable systems.

KEY ACHIEVEMENTS

- **Led backend teams of 3–6 developers**, establishing coding standards, CI/CD best practices, and agile delivery processes.
- **Migrated legacy services to AWS Cloud**, automating deployments via **GitHub Actions and AWS CDK** for faster, more reliable releases.
- **Designed and implemented an intelligent appointment scheduling engine**, reducing booking conflicts by **25%** and optimizing resource utilization.
- **Mentored interns and junior developers**, improving team productivity and code quality.

EMPLOYMENT HISTORY

Evolutio Care Innovations, Sligo Ireland

March 2025 - Present

Senior Software Developer

- Architected scalable backend services for UK eyecare clinics using **NestJS (Node.js), AWS services, and AWS Oracle RDS**, ensuring secure, high-availability data processing.
- Developed an **intelligent appointment scheduling engine** using greedy search and backtracking algorithms, reducing booking conflicts and optimizing resource utilization.
- Led a **backend team of 2 - 4 developers**, defining coding standards, CI/CD pipelines (**GitHub Actions, AWS CDK**), and agile delivery practices for predictable, on-time releases.
- Implemented a **distributed request-tracking system** using **EventEmitter, AWS SQS, Lambda, and DynamoDB**, enabling reliable asynchronous workflows and improved observability across microservices.
- Designed and maintained automated **unit and integration tests** using **Jest and Supertest**, executed before every GitHub merge to ensure code quality and prevent regressions.

Ergo Technology Group, Dublin Ireland

Sept 2024 – Feb 2025

Software Developer

- **Designed and implemented a chatbot feature in ServiceNow** to help users track open IT support tickets, improving response time and user engagement.
- Utilized **ServiceNow Test Management Framework 1.0** to design, execute, and manage test cases, maintaining high software quality standards.
- Collaborated with ITSM teams to **enhance automation** and streamline ticket management processes within the ServiceNow ecosystem.

Techspian, Pune India

Mar 2021 – May 2023

Senior Software Developer

- **Architected and led development of a high-throughput microservices platform (Fittr)** processing **50K+ daily requests**, optimizing database queries and caching layers to significantly reduce system latency.
- **Designed and implemented distributed backend architecture for TravelBrands**, a large-scale flight booking platform handling **10K+ concurrent users**, integrating **Sabre APIs**, and setting up **CI/CD pipelines and caching mechanisms**.

- **Developed reusable wrappers** for the networking layer to standardize HTTP communication and dependency injection across multiple Node.js services.
- **Implemented request and response scraping** in Node.JS services to enhance **traceability**, streaming data to **AWS Firehose** and visualizing logs in **Kibana** for monitoring and debugging.
- **Led code reviews and mentored developers** on microservices best practices, clean architecture, and scalable design patterns.

Threeplus, Pune India

June 2019 – Jan 2021

Senior Software Developer

- **Led end-to-end development of 10+ mobile and web applications** for international clients using **Flutter, Node.js, and AWS**.
- **Architected location-based backend services** supporting users with **real-time updates and geospatial queries** using Node.js and MongoDB.
- **Managed and mentored a team of 3 - 4 developers**, establishing coding standards and review processes to improve code quality.
- **Delivered high-quality projects on time** through implementation of **CI/CD pipelines and robust code review practices**.

e-Zest Solutions Pvt Ltd, Pune India

Aug 2017 – Jun 2019

Software Developer

- Designed and developed a **cross-platform mobile application** for a Detroit-based private club serving members from **Fortune 500 companies**, using **Swift (iOS)** and **Java (Android)**.
- **Implemented software design patterns** (MVC, Singleton, Observer, VIPER) to enhance scalability and maintainability of mobile applications.
- Supported deployment and publishing of mobile applications on **App Store** and **Google Play**, ensuring compliance with store guidelines.
- Collaborated with **UI/UX designers and backend engineers** to ensure seamless integration of APIs and visually appealing user experiences.

SKILLS

Backend

Node.JS

NestJS

Languages

Typescript

JavaScript ES6

Java

Cloud & DevOps

AWS(CDK, ECS, EC2, Lambda, SQS, SNS, RDS etc)

GitHub Actions

Additional

iOS(Swift)

Android(Java)

ReactJS

Databases

Oracle, Redis

DynamoDB, MySQL

Containerization

Docker

Testing

Jest, Supertest

EDUCATION

MSc in Advanced Computer Science

Technological University Dublin, Dublin Ireland

Sept 2023 – Sept 2024

BE in Computer Science

G.H Rasoni College Of Engineering, Nagpur India

Aug 2011 – Sept 2016

PROJECT

SmartWardrobe – Developed the backend for an AI-driven fashion platform, utilising multimodal LLMs for natural language search and image similarity matching, with a recommendation system powered by vector databases and OpenAI CLIP model embeddings. [GitHub](#).
