

SALIL LULEY

Software Developer

6+ years of expertise in architecting distributed backend systems & microservices with recent focus on integrating multimodal LLMs and vector databases for AI-powered applications.

SKILLS

Backend: Node.JS, NestJS, Spring Framework, Microservices **Cloud & DevOps:** Docker, AWS, Azure, GitHub Actions **Databases:** MySQL, PostgreSQL, Redis, MongoDB, DynamoDB, Vector Databases **Languages:** TypeScript, JavaScript (ES6), Java **AI/ML:** Multimodal LLMs, Faiss **Additional:** React.JS, iOS (Swift), Android (Java), HTML, CSS

WORK EXPERIENCE

ERGO TECHNOLOGY GROUP

Dublin, Ireland

SOFTWARE DEVELOPER

Sept 2024 – Present

- **Ergo Projects:** Designed, developed, and implemented **customized ServiceNow solutions** to address in-house ITIL project requirements.
- **Test Management:** Leveraged ServiceNow's Test Management Framework 1.0 to design, execute, and manage comprehensive test cases, ensuring quality assurance and alignment with client requirements throughout the development lifecycle.

TECHSPIAN

Pune, India

SENIOR SOFTWARE DEVELOPER

March 2021 – May 2023

- **Fitr:** **Architected** and led development of a high throughput **microservices platform** processing 50K+ daily requests, achieving 40% reduction in system response time through **optimized database queries** and **caching strategies**. Employed **distributed tracing** with Kibana.
- **TravelBrands:** **Designed** and implemented **distributed backend architecture** for flight booking system handling 10K+ concurrent users, integrating Sabre APIs. **Implemented** database **schema design**, set up **CI/CD pipelines**, **caching** and version control. **Containerization** with Docker resulting in high availability & scalability.
- Led technical design reviews and **mentored 3 junior developers**, focusing on microservices best practices and clean architecture principles

THREEPLUS

Pune, India

SENIOR SOFTWARE DEVELOPER

June 2019 – January 2021

- **Parco:** **Architected** and led development of location-based **backend services** supporting 5K+ users, implementing geospatial queries and real-time updates using Node.js and MongoDB. **Led** a team of **4 developers**, establishing coding standards and review processes.
- **MMR:** Designed scalable API architecture for PDF generation service, processing 10K+ documents monthly.
- Implemented **comprehensive testing** strategy achieving 90% code coverage, reducing post-release defects by 60% **through integration tests** and **API contract testing**.

e-ZEST SOLUTIONS PVT LTD

Pune, India

SOFTWARE ENGINEER

August 2017 – June 2019

- **Detroit Athletic Club App:** Developed **scalable backend services** for mobile applications using Spring Boot, **handling authentication** and **real-time notifications for 10K+ users**. Designed and maintained RESTful APIs with comprehensive documentation using Swagger, achieving 99.9% uptime.

EDUCATION

MSc In Computer Science (Advanced Software Development)

Sept 2023 – Dec 2024

Technological University Dublin, Ireland.

Coursework: Software Design, Systems Architectures, Advanced Databases, Secure Systems Development, User Experience Design.

Bachelor Of Engineering in Computer Science

June 2011 – June 2016

G.H Raison College Of Engineering, Nagpur, India.

PROJECTS

SmartWardrobe – Developed the backend for an **AI-driven fashion platform**, utilizing **multimodal LLMs** for natural language search and image similarity matching, with a recommendation system powered by **vector databases** and OpenAI CLIP model embeddings. [GitHub](#).

Paper Converse - Built a Next.js app for querying PDFs using multimodal LLMs, leveraging vector databases and **OpenAI CLIP model** embeddings to provide **semantic search** and document insights. [GitHub](#).
