

SALIL LULEY

Software Developer

7+ years of expertise in architecting distributed backend systems & microservices with recent focus on integrating multimodal LLMs and vector databases for AI-powered applications.

Sligo, Ireland

SKILLS

Backend: Node.JS, NestJS, Spring Framework, Microservices **Cloud & DevOps:** Docker, AWS, AWS CDK, Azure, GitHub Actions **Databases:** MySQL, PostgreSQL, Oracle, Redis, MongoDB, DynamoDB, Vector Databases **Languages:** TypeScript, JavaScript (ES6), Java **AI/ML:** Multimodal LLMs, Faiss Index **Additional:** React.JS, iOS (Swift), Android (Java), HTML, CSS

WORK EXPERIENCE

EVOLUTIO CARE INNOVATIONS

SENIOR SOFTWARE DEVELOPER

Sligo, Ireland

Mar 2025 – Present

- **Eye Care Solutions:** We develop applications for our **UK clinics**, using Node.js, AWS services, NestJS and Oracle databases to streamline eye care management.
- **Team Leadership:** I lead a team of backend developers, ensuring collaboration, best practices, and timely delivery using agile methodology.

ERGO TECHNOLOGY GROUP

SOFTWARE DEVELOPER

Dublin, Ireland

Sept 2024 – Feb 2025

- **Ergo Projects:** Designed, developed, and implemented **customized ServiceNow solutions** to address ITIL project requirements.
- **Test Management:** Leveraged ServiceNow's Test Management Framework 1.0 to design, execute, and manage comprehensive test cases, ensuring quality assurance and alignment with client requirements throughout the development lifecycle.

TECHSPIAN

SENIOR SOFTWARE DEVELOPER

Pune, India

Mar 2021 – May 2023

- **Fittr:** Architected and led development of a high throughput **microservices platform** processing 50K+ daily requests, achieving 40% reduction in system response time through **optimized database queries** and **caching strategies**. Employed **distributed tracing** with Kibana.
- **TravelBrands:** Designed and implemented **distributed backend architecture** for flight booking system handling 10K+ concurrent users, integrating Sabre APIs. **Implemented** database **schema design**, set up **CI/CD pipelines**, **caching** and version control. **Containerization** with Docker resulting in high availability & scalability.
- Led technical design reviews and **mentored 3 junior developers**, focusing on microservices best practices and clean architecture principles

THREEPLUS

SENIOR SOFTWARE DEVELOPER

Pune, India

June 2019 – Jan 2021

- **Parco:** Architected and led development of location-based **backend services** supporting 5K+ users, implementing geospatial queries and real-time updates using Node.js and MongoDB. **Led** a team of **4 developers**, establishing coding standards and review processes.
- Implemented **comprehensive testing** strategy achieving 90% code coverage, reducing post-release defects by 60% through **integration tests** and **API contract testing**.

e-ZEST SOLUTIONS PVT LTD

SOFTWARE ENGINEER

Pune, India

Aug 2017 – June 2019

- Developed scalable backend services with Node.js for Detroit Athletic Club App, handling authentication, real-time notifications, and RESTful APIs for 10K+ users with 99.9% uptime.

EDUCATION

MSc In Computer Science (Advanced Software Development)

Technological University Dublin.

Dublin, Ireland

Sept 2023 – Dec 2024

Coursework: Software Design, Systems Architectures, Advanced Databases, Secure Systems Development, User Experience Design.

PROJECTS

SmartWardrobe – Developed the backend for an **AI-driven fashion platform**, utilizing **multimodal LLMs** for natural language search and image similarity matching, with a recommendation system powered by **vector databases** and OpenAI CLIP model embeddings. [GitHub](#).
