EMPLOYMENT HISTORY

Senior Software Developer

Evolutio Care Innovations

📅 Mar 2025 – Present 📍 Sligo, Ireland

- **Leading a team of 3 backend developers** and **architecting** scalable, highly available backend **microservices** for UK Evolutio eyecare clinics **using NestJS (Node.js), AWS services (ECS, EC2, AWS Oracle RDS, Lambda, DynamoDB, SQS, SNS etc)** ensuring secure, high-availability data processing.
- **Implemented a distributed request-tracking system** using **EventEmitter, AWS SQS, Lambda, and DynamoDB**, which enabled reliable asynchronous workflows and improved observability across services.
- Designing and maintaining **automated unit and integration tests with Jest, Supertest, and K6**, expanding test coverage to 90% of the codebase.
- **Designing and optimising complex SQL queries** for high-volume appointment and clinical data processing by **adding indexes, materialised views and normalising database tables**.
- Troubleshoot failover issues and **designed highly available ECS-based services** by analysing AWS RDS Oracle failover scenarios, connection pooling behaviour, and DNS caching, improving system stability during Multi-AZ failovers.

Software Developer

Ergo Technology Group

📅 Sept 2024 – Feb 2025 📍 Dublin, Ireland

- **Designed and implemented a ServiceNow chatbot** for technical teams and customers to track open IT support tickets, enhancing customer engagement and reducing query resolution time by 50%.
- Utilised ServiceNow Test Management Framework 1.0 to design, execute, and manage test cases, maintaining high software quality standards.

Senior Software Developer

Techspian

📅 Mar 2021 – May 2023 📍 Pune, India

- Played a **key role in developing** a high-throughput **microservices** platform at Fittr a fitness unicorn startup, **processing a high volume of requests per minute** while maintaining response times under 150ms **by adding caching layers, optimising queries and fire-and-forget patterns**.
- **Designed and implemented a microservices** backend architecture for TravelBrands, a **flight booking platform handling 10K+ concurrent users**, integrating Sabre APIs, following object oriented design principals for robust, maintainable code structure.
- **Implemented reusable wrappers** for the networking layer **to standardise HTTP communication, database queries and employed clean code architecture** improving modularity, thus reducing chances of issues.
- **Developed backend service** to enhance traceability, monitoring and debugging **by scraping request and response and streaming data to AWS Firehose**, and **visualising logs in Kibana**.

Senior Software Developer

Threepius

📅 June 2019 - Jan 2021 📍 Pune, India

- **Led end-to-end development of 10+ web applications** for international clients **using Node.js and AWS**.
- **Architected location-based backend services** supporting users with real-time updates and geospatial queries using Node.js and MongoDB while managing and mentoring a distributed team of 4 developers.

Software Developer

e-Zest Solutions

📅 Aug 2017- June 2019 📍 Pune, India

- **Worked on the DAC project using Java Spring Boot**, developing RESTful APIs, integrating with MySQL, and implementing controllers, services, repositories, and DTO-based request/response models.
- **Built backend utilities for Abbott projects using Node.js**, including middleware, reusable modules, collaborating with cross functional teams to design API contracts.

PROFILE

Innovative and highly motivated Software Developer **with 8 years' experience** designing and developing scalable backend systems, cloud-native architectures, and DevOps automation. **Skilled in building REST Services on AWS using Node.js/NestJS, Oracle database integrations**, managing deployments with CI/CD pipelines and **automated testing (Jest, Supertest)**, and **leading cross-functional teams** to deliver high-performance, secure applications. **Bringing strong communication and problem-solving skills**, with a proven ability to **collaborate effectively in agile, customer-focused, and fast-paced engineering environments**.

KEY ACHIEVEMENTS

- **Leading a team of 3** backend developers, mentoring interns and junior developers, establishing coding standards, improving team productivity, and agile delivery processes.
- **Migrating legacy services to AWS Cloud**, automating deployments and environment provisioning **with GitHub Actions and AWS CDK** for faster, more reliable releases, ensuring CI/CD best practices achieving near zero downtime.

SKILLS

Backend: Node.js, NestJS, Java, Typescript, JavaScript ES6.

Cloud & DevOps: AWS(CDK, ECS, EC2, Lambda, SQS, SNS, RDS etc), GitHub Actions, Docker.

Databases: Oracle, MySQL, DynamoDB, Redis.

Testing: Jest, Supertest, K6

Other: iOS(Swift),Android(Java),ReactJS

EDUCATION

🎓 **MSc in Advanced Computer Science**
Technological University Dublin

📅 Sep 2023 - Oct 2024 📍 Dublin, Ireland
Coursework: Design Patterns, Core Java, Node.js, React, Databases (Oracle, NoSQL), UI/UX

🎓 **BE in Computer Science**

G.H Rasoni College Of Engineering

📅 Aug 2011 - Sep 2016 📍 Nagpur, India

CERTIFICATIONS

- Pursuing AWS Solutions Architect.
- KodeKloud AWS Certifications ([ECS](#), [S3](#), [EC2](#), [Lambda](#)) and learning Kubernetes.
